Company Profile

Karma Metal Industries is a leading manufacturer and supplier of high-quality precision components and engineering products for a wide range of industries worldwide. Backed by advanced manufacturing facilities, modern machining technology, and a strong focus on precision engineering, we manufacture an extensive range of CNC turned parts, machined components, fittings, inserts, fasteners, and customized metal parts with consistent quality, zero-defect production standards, and timely delivery.

Our commitment to innovation, strict quality control, and customer satisfaction has established us as a trusted partner in domestic as well as international markets. We provide both standard and customized solutions based on customer drawings, samples, and technical requirements, ensuring reliable performance across diverse industrial applications.

Our aim is to build long-term business relationships through quality products, competitive pricing, dependable service, and continuous growth, creating a strong and mutually beneficial partnership with our customers worldwide.

Infrastructure

With a strong manufacturing and supply network, Karma Metal Industries has developed a modern and well-equipped infrastructure to ensure smooth production, efficient operations, and timely delivery. Our facility is organized into specialized departments managed by skilled professionals and equipped with advanced automatic and semi-automatic machinery to maintain high precision, productivity, and consistent quality standards while efficiently handling bulk as well as customized production requirements.

Quality Assurance

Quality and durability are the foundation of our products, and we follow a strict quality control system aligned with international standards throughout the entire manufacturing process. From raw material inspection to final dispatch, every stage is carefully monitored by our experienced quality control team to ensure precision, consistency, and reliable performance in all products.

All components undergo rigorous testing using advanced inspection and laboratory equipment to verify dimensional accuracy, durability, and repeatability, even for tight-tolerance applications. We also provide complete quality documentation including material test certificates, dimensional reports, plating reports, and PPAP documentation as per customer requirements.

Our commitment to continuous improvement, advanced quality practices, and customer satisfaction enables us to maintain high manufacturing standards and deliver products that meet the demanding requirements of various industrial and engineering applications worldwide.

Our Products Range

Our products are manufactured using high-quality brass and other premium metal materials known for their durability, corrosion resistance, strength, and precision. These components are produced using advanced processes such as CNC machining, turning, milling, drilling, and precision engineering techniques to achieve accurate dimensions, tight tolerances, and reliable performance for various industrial applications.

Products Details

Karma Metal Industries is engaged in the manufacturing and supply of high-quality precision components and engineering products made from Brass, Stainless Steel (SS), Mild Steel (MS), Aluminum, Copper, and various other ferrous and non-ferrous metals. Our product range includes precision turned components, CNC and VMC machined parts, brass inserts, electrical parts, hydraulic and pneumatic fittings, automotive components, sanitary fittings, fasteners, and sheet metal parts. All products are manufactured using premium-grade raw materials and advanced machining technology to ensure excellent dimensional accuracy, strength, durability, and corrosion resistance.

We serve a wide range of industries including automotive, electrical, electronics, engineering, hydraulic, pneumatic, agriculture, construction, and industrial manufacturing. Our components are available in different sizes, dimensions, finishes, materials, and grades to meet the exact requirements of our customers. With strict quality control processes and modern manufacturing infrastructure, we ensure reliable performance, precision engineering, competitive pricing, and timely delivery for every project.

At Karma Metal Industries, we specialize in manufacturing customized products based on customer drawings, samples, designs, and technical specifications. Our experienced team works closely with clients to deliver cost-effective and application-specific solutions for complex industrial requirements. With a strong commitment to quality, innovation, and customer satisfaction, we have established ourselves as a trusted manufacturing partner for domestic as well as international clients.

Machinery We Use

Our manufacturing unit is equipped with advanced machinery and modern technology to ensure precision, efficiency, and consistent quality in component production. Our infrastructure includes CNC machining centers, VMC machines, die casting machines, lathes, milling and grinding machines, electroplating equipment, along with advanced inspection and testing instruments, enabling us to deliver high-quality precision components tailored to the specific requirements of clients across various industries.

Material We Use

We use high-quality raw materials such as Free Cutting Brass IS 319 Type (I), BS 249 Type (I), RoHS-compliant brass grades, copper, stainless steel, mild steel, aluminum, phosphorus bronze, and other ferrous and non-ferrous metals as per customer requirements. All materials are carefully selected to ensure durability, precision, corrosion resistance, and reliable performance across various industrial applications.

We also provide customized material grades and compositions based on customer specifications and engineering requirements. This includes stainless steel grades like 303 and 304, mild steel grades such as EN 1A (BS 970 230M07), aluminum grades like 1070, and other special materials suitable for precision turned and machined components.

Threads

We can manufacture components with various threading standards including ISO Metric (MM), PG, BSW, BSP, BSB, BSF, BA, NPT, NPTF, UNC, UNF, UNEF, and other international thread specifications. We also develop customized and special threads as per customer drawings, designs, samples, and technical requirements to ensure precise fitting and application performance.

Finish & Coating

We provide a wide range of surface finishes and coatings including Natural Aluminum, Natural Steel, Nickel Plating, Chrome Plating, Tin Plating, Zinc Blue Plating, Anodizing, Silver Plating, Gold Plating, Lead Coating, and other customized finishes as per customer specifications and application requirements. All finishing processes are carried out to ensure superior corrosion resistance, durability, appearance, and long-lasting performance.

Industries We Serve

We manufacture customized precision parts for a wide range of industries including automotive, textile, telecom, railway, aerospace, marine, oil and gas, construction, agriculture, medical equipment, electrical and electronics, hydraulic and pneumatic systems, sanitary and plumbing, home appliances, industrial machinery, water treatment plants, cable accessories, PCB assemblies, fire safety systems, and LPG & CO2 gas equipment. Our components are designed and manufactured to meet diverse industrial applications and customer-specific requirements with high precision, durability, and reliable performance.

Packaging & Export

We supply our products to both domestic and international industrial markets with secure and export-quality packaging standards. Our packaging solutions are designed to ensure maximum protection during transportation and storage, using durable outer cartons, individual inner boxes, poly bags for smaller quantities, and securely sealed packaging materials available in various sizes and designs as per customer and shipment requirements.
